

The **METALICA® glazing** are hydrophobic EVA laminated glasses incorporating metallized materials.

METALICA® DICHROIC C glasses are coated with metal oxides in thin, hard layers.

The combination of layers provides different colors, depending on reflection and transmission conditions, and also on the viewing angle.

There are 3 different versions :

- DICHROIC C1 : Blue / Orange
- DICHROIC C2 : Yellow / Blue
- DICHROIC C3 : Pink / Green

| Discover the three versions

DICHROIC C1
Blue / Orange

DICHROIC C2
Yellow / Blue

DICHROIC C3
Pink / Green

| Advantages

- Long-term sustainability
- Can be tempered and/or EVA laminated
- Indoor and outdoor use
- No orange skin appearance

| Applications

- Glass sun-shading
- Glass partition and interior door
- Shower screen
- Glass railing
- Furniture
- Glass signage

| Technical data

	Colors	Light reflection	Light transmission
CHROME 1	Blue / Orange	30,1 %	70,9 %
CHROME 2	Yellow / Blue	40,8 %	58,6 %
CHROME 3	Pink / Green	70,6 %	30,7 %

Note: the values given were measured on a 6mm glass based on the EN410 Standard.

These glasses can be used as simple glass, tempered or laminated glass.

They are CE-marked, and are in the process of being certified according the EN12543/12150 Standard.

Standard dimensions are from 2440 x 1220 mm to 3300 x 2440 mm.
